Key Information Document

CREDIT SUISSE
Part of UBS Group

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, and potential gains and losses of this product and to help you compare it with other products.

Product

Product name/ISIN	CSIF (Lux) Equity Canada - share class FB CAD (the **Product**); ISIN LU1419778904; a share class of CSIF (Lux) Equity Canada (the **Sub-fund**) a Sub-fund of Credit Suisse Index Fund (Lux) (the **Umbrella** / the **Investment Company**) The Product is a UCITS Sub-fund established in Luxembourg. It is managed by Credit Suisse Fund Management S.A. (the **Management Company**).
Product Manufacturer	**Credit Suisse Fund Management S.A.**, member of UBS Group; 5, rue Jean Monnet, P.O. Box 369, L-2013 Luxembourg. Call +352 43 61 61 436 or visit www.credit-suisse.com/fundsearch for more information.
Competent regulatory authority	Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising Credit Suisse Fund Management S.A. in relation to this Key Information Document

This document was prepared on 10 July 2024.

What is the product?

Type: This Product is an investment company qualifying as UCITS Sub-fund in accordance with the UCITS law.

Term: This Product has no maturity date. The Sub-fund has been established for an indefinite period of time. The Board of Directors of the Investment Company is entitled to liquidate, merge or reposition the Product at any time unilaterally in case the Product can no longer be managed in the interest of the investors. The amount the investor will receive upon early termination may be less than the amount invested.

Objectives: This Index Tracker Sub-fund is passively managed aiming to replicate the performance of the MSCI Canada (NR) Index. The Index is a free float-adjusted market capitalization weighted index that is designed to capture the market performance of large and mid cap Canada equities and is rebalanced on a quarterly basis and may also be rebalanced at other times. The portfolio and the performance of the Sub-fund can deviate from the index. Under normal market conditions, it is expected that the anticipated level of tracking error will be less than 0.10%. The Sub-fund uses a physical replication strategy and invests mainly in a representative selection of equities and equity - type securities and rights, including shares, dividend-right certificates, shares in cooperatives, participation certificates, issued by companies which are part of the index. At the same time, the Sub-fund can use derivatives to achieve the above aims. As compared to the full replication method, the representative sampling method may lead to lower transaction costs in the context of portfolio rebalancing, as well as to higher variability of the difference between the return of the index and the return an investor in the Sub-fund receives. The investor can buy or sell shares of the Sub-fund on a daily basis, as further defined in the prospectus. This Share Class does not make distributions.

Intended Retail Investor: This Product is intended for retail investors as well as institutional investors with sufficient knowledge and experience in collective investment schemes and similar products, an ability to bear an average investment loss, and a long-term investment horizon.

What are the risks and what could I get in return?

(A) Summary Risk Indicator

The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less.

The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. We have classified this Product as 4 out of 7, which is a medium risk class and poor market conditions could impact our capacity to pay you. **Be aware of currency risk** if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

(B) Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**
The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 12 years. Markets could develop very differently in the future.
The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period:		**7 years**	
Example Investment:		CAD 10,000	
Scenarios		**If you exit after 1 year**	**If you exit after 7 years** (Recommended holding period)
Stress scenario	**What you might get back after costs** Average return each year	**CAD 602** -94.0%	**CAD 426** -36.3%
This type of scenario occurred for an investment CSIF (Lux) Equity Canada FB CAD between 03.2022-07.2024.			
Unfavourable scenario	**What you might get back after costs** Average return each year	**CAD 8,526** -14.7%	**CAD 10,722** 1.0%
This type of scenario occurred for an investment MSCI Canada (NR) between 09.2012-09.2019.			
Moderate scenario	**What you might get back after costs** Average return each year	**CAD 10,833** 8.3%	**CAD 15,945** 6.9%
This type of scenario occurred for an investment CSIF (Lux) Equity Canada FB CAD between 01.2016-01.2023.			
Favourable scenario	**What you might get back after costs** Average return each year	**CAD 14,065** 40.6%	**CAD 18,597** 9.3%

What happens if Credit Suisse Fund Management S.A. is unable to pay out?

The investor of this Product will not face financial loss due to the default of Credit Suisse Fund Management S.A., as the Sub-fund is considered to be a separate entity with segregated assets.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- CAD 10,000 is invested

	If you exit after 1 year	**If you exit after 7 years** (Recommended holding period)
Total costs	CAD 31	CAD 180
Annual cost impact (*)	0.3%	0.3%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.2% before costs and 6.9% after costs.

d7ba2dff-4a0b-41fa-a7b3-22809928e6dc

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0.0% of the value of your investment when entering.	CAD 3
Exit costs	0.0% of the value of your investment before it is paid out to you.	CAD 3
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.2% of the value of your investment per year.	CAD 20
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CAD 5
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	n/a

How long should I hold it and can I take money out early?

Recommended holding period: 7 years

The recommended holding period is calculated based on the Summary Risk Indicator presented above. According to the investment objective as described above, the Product is designed for long-term investment. The Product is an open-ended Product. The investor can sell their investment on a daily (on business days) basis. Redemption fees will be charged at the level of the Product.

How can I complain?

Any complaint regarding the person advising on, or selling the Product can be submitted directly to that person or bank. Any complaint regarding the Product or this document can be submitted in writing under the following address: Credit Suisse Fund Management S.A., 5, rue Jean Monnet, P.O. Box 369, L-2013 Luxembourg. Investors shall note that a complaint can be also addressed by e-mail to fundcomplaints.luxembourg@credit-suisse.com or visit website: www.credit-suisse.com/fundsearch.
